

# Fiber Shutter Arrays

Phoenix Photonics fiber management solutions

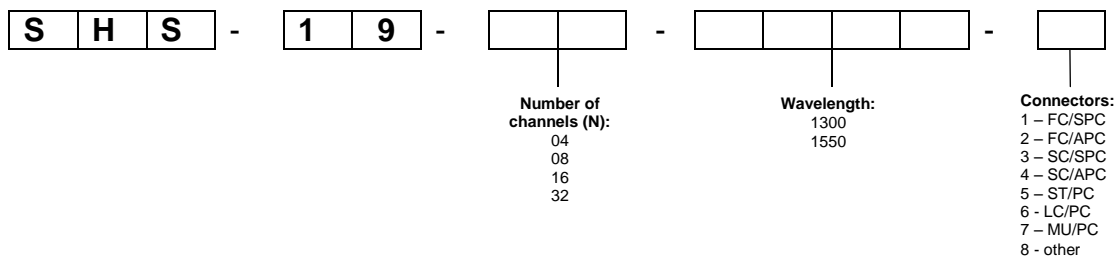

- Simple method for selective fiber activation
- Front panel on-off toggle switch selection for each fiber
- LED indicator to show 'live' fibers
- Simple all-fiber construction for low loss
- Wide wavelength range
- Single mode and multimode options
- Solid state no moving parts 1x1 switch.
- High isolation

## Single mode fiber version

The units utilize the Phoenix single mode fibre shutter on each channel.
